PRICES OF STOCKS IN SHARP BREAK

SEVERAL LEADERS SUFFER DECLINES ON OPENING.

RECOVERY SOON FOLLOWS

Appreciable Reaction Sets in During Second Hour, But Not Before Number of Securities Fall Below Monday's Close.

By Associated Press.

NEW YORK, Aug. 22.—Prices broke sharply at the opening of the stock market, Union Pacific, the feature, falling 1½ points and Southern Pacific, Reading, Amalgamated Copper, Lehigh Valley, Canadian Pacific and Atchison declining a point or more, with weakness elsewhere in the list.

The market made appreciable recovery from opening prices, but not before a number of stocks had fallen under yesterday's low. These included Union Pacific, Southern Pacific, Canadian Pacific, Northern Pacific, Great Northern pfd, Atchison, Lehigh Valley, St. Paul, Consolidated Gas and International Harvester. By 11 o'clock a majority of the losses were fully recovered, but the undertone continued heavy.

Early weakness was ascribed to authoritative reports of another setback in the Moroccan negotiations. This found reflection in the Paris market as well as London, where Americans were heavy. In the second hour Union Pacific recovered three points from its opening price, Southern Pacific and Lehigh Valley. Large transactions in steel were conspicuous. The rally was only fairly well sustained, trading became very dull. Bonds were steady.

The market was practically featureless during the midday except for the further heaviness of Union Pacific, and a sharp decline of 1½ in Baltimore & Ohio, despite the latter's fairly good showing for July. Business fell to the lowest point of the session. Union Pacific fell back close to the morning's low, and steel lost all its gains, with general weakness all around. Buying of Union Pacific rallied prices in part, after which the market lapsed into a dull drift.

The market closed steady. U. S. Steel was the feature of the last hour, advancing to 72, its best price of the day, on heavy offerings. The list as a whole was favorably influenced, and closing prices showed reflecting more than moderate support.
