Au Revoir.

Summer is going—did you know it? She has left this sign behind:
A blue bird's feather she dropped in the meadow.
She is leaving us—ah, unkind!
In her bonny hair she wore this feather.
When the young June smiled in her glory.
Blue and white are the feather's colors.
Telling part of the Summer's story.
They tell of days of sun and shadow.
White clouds and soft blue haze
Days when the earth seemed just a lyric
Sung in sweet Summer's praise.
Only a feather—I read its message
"Goodbye—au revoir—ma chere,
I hear the rustling robe of Autumn,
She'd be worried to find me here."
—Exchange.

One of the strongest and best companies on the road, with special scenery, light effects, band, orchestra and megaphone quartet will present The Winning Hand at the opera house Wednesday, September 13.

Announcements have been received of the wedding of Miss Mabel Andrews of Paw Paw to Clarence W. Barber of Knoxville, Tenn. Mr. and Mrs. Barber were both graduated from the university in 1903—Ann Arbor Register.

Wednesday, September 13, the South Bend central league team will play on the athletic grounds. September 15 the Petoskey team, champions of northern Michigan, will cross bats with the Paw Paw team. We can look for base ball to be played in each game.

The village streets are positively filthy. The sanitary conditions would be materially improved if the gutters were cleaned.—Otsego Union. If Paw Paw people could know of all the complimentary things said of their town, their work in cleaning up around their homes would be as play to them, and President Decker and the village officials would feel fully repaid for the painstaking manner in which they have performed their official duty.

SHADY NOOK.

Is the title of Jeff Chaffee's resort on Four Mile lake, and this picture gives a fair view of what is in store for those who avail themselves of the opportunity offered by spending a few days beneath its hospitable roof.

Manager Longwell announces one of his banner attractions this season, the charming play of New York life, The Winning Hand; full of fun. Eddie Delaney, the funny comedian, helps you forget dull care. At opera house Wednesday, September 13. Prices for all, 25c, 35c, 50c.

A pleasant ceremony was performed by Rev. I. P. Bates, Wednesday evening, at the home of James Hill in Almena, when he united in marriage Miss Gertrude Hill and Wilbur Stoughton. There were about 40 relatives and friends in attendance to wish the happy couple God speed on their life's journey.

One of the athletic events of the season was the meeting of quill pitchers at the home of J. J. Rielly a few days since, when the championship of that class of sport was settled by the defeat of Frank Coffinberry and partner by Messrs. Davis and Raleigh of Chicago. We understand that Mr. Rielly was stake holder and Mr. Gubbins of Chicago drove the stakes and refereed the disputed points.

From the 16th biennial report of the state board of fish commissioners we find that the fish industry of Michigan is of greater importance and magnitude than is generally known. The commercial fishermen for the year 1902 caught in the great lakes a total of 46,241,300 pounds valued at \$1,461,724. Employed in this work were 5,889 men, 137 steamers, 683 sail boats and 1,032 other craft. The amount invested was \$1,670,878. This important industry is one that is but little understood by our people, and in the future should have greater attention paid to it both in propagation and protection.

(Concluded next week.)

"That Universal Hot Blast"

Is the most powerful heater made. This stove gives a strong hot blast in sufficient volume sufficiently hot at the proper point to insure perfect combustion. No tube to burn out; no ring to warp. Ashes cannot accumulate in the Universal Hot Blast belt. This stove saves nearly 1/2 the fuel by giving nearly double the heat.

Intense Heat from Cheap Fuel.

This hot blast duct in this oak stove does not in the least interfere with the burning of bulky fuel, while it conveys the hot air blast to just that part of the fire chamber where it is required to effect the best results. Where soft coal is used cold air enters the hot blast ring in the rear of the stove and is discharged through openings in the ring into the fire chamber at the level of the fire pot. Here it mingles with the gases arising from the coal, making perfect combustion and consuming that part of the fuel that in most stoves is wasted out of the chimney.

The Most Economical Direct Draft Hard Coal Made.

The most economical because it has a single fire pot. Did you ever stop to think how much fuel is wasted in heating through dead air space between the inside and outside bowls to a double bowl stove? Air space in a brick wall prevents frost from going through; air space in a refrigerator keeps the cold air inside; then why wont an air space between these fire bowls keep a lot of the heat on the inside? If you foot the fuel bills just think of this. Th Universal Oak for hard coal, for soft coal and for wood costs.....
