Cuts Wires Connecting With Osceola Exchange.

Wires of the Klondike exchange, an independent telephone company, were severed from connections with the Osceola exchange to-day. A Satisfying Food.

Appetite is Natue's signal for fuel and repairs.

Healthy appetite calls for the simple food elements that supply the natural requirements.

Healthy appetite is satisfied when the proper kind and amount of food is taken into the body at stated intervals. But the wiles of the modern chef and caterer have created a world of temptations, of false and often injurious appetites, leads into all the different degrees of indigestion, dyspepsia, etc.—food insanity.

The crisp, firm, "nutty" granules of Grape-Nuts make honest mastication necessary. Its wholesome flavor makes it appetizing, and the albumen, carbohydrates and Potassium Phosphate from the whole wheat and barley, makes it a satisfying food—both to the sense of taste and to the body needs.

Ten days' trial will convince any one that
