In The Path

TO HEALTH

You sometimes need to call on the doctor to help you across some rough or dangerous place. He in turn will direct you to the druggist of obvious importance to help you on your journey and it is as necessary that these supplies be on hand in full strength and purity, duly compounded and carefully prepared as that the doctor should be ever ready to help.

In serious sickness a few days drug store is of prime importance. Let us assist you in the path to health.

LOOK
SHUR-ON
THERE IS A DIFFERENCE.

There is hardly a day passes that we do not hear some one say they bought a pair of glasses for 25c that were better than any they had ever had. If they knew what these 25c glasses were they would certainly leave them alone. They are made in large quantities and are usually pressed into shape while the glass is hot; you can distinguish the difference by looking through a cheap pane of window glass and then looking through a French or American plate. The cheap glass will be wavy and full of ripples just as with cheap spectacles. If your judgment is good you cannot help knowing that such a lens is injurious to the eye. We use nothing but the best made for you at

Several people who were prominent in local independent ball games will participate in the contest.

PAVING TANGLE UP

JUDGE FUNK HEARS ARGUMENTS IN STULITIGE CASE.

Mishawaka Files Demurrer to Amended Complaint—Property Owners Seek Injunction.

Mishawaka paving matters are before court to-day before Judge Walter A. Funk in chambers in the St. Joseph circuit court. The line of contention is the pavement of Main, Mishawaka and Lincoln streets, in Warren Bros. bitulithic pavement as proposed by the Mishawaka common council. Property owners are making an effort to secure a permanent injunction against the city authorities.

When the case was heard last week the property owners filed amended complaints. The morning the city filed demurrers to each of the complaints in which it contends that the facts as stated in the complaints are not sufficient to constitute a cause of action. The question is being argued up to the hour of going to press.

Attorneys for the plaintiffs are Mr. F. Wilson, of Indianapolis, one of the ablest attorneys in the state, who is associated with Congressman C. Chapman and his partner, Charles Crabill, of Mishawaka. The city is represented by Mr. Chas. Ross, of Mishawaka, and Mr. Pavement, whether or not the pave- ment is a moral proven.

Harry R. Wair, who with W. A. Mc- Cormick, represents the property owners, opened the argument for the plaintiffs. He said that the city of Mishawaka permitted the City of Milwaukee entitled competition and thereby proceeded contrary to the statutes, which specify competitive bidding. He said that the city of Mishawaka had asked for bids on bituminous macadam instead of 50 Warren Bros. Bitulithic. They could have granted the law and left the bidding open to competition.

Mr. Wair said that the city of Mishawaka had contracted for the work that had been decided in favor of the South Bend Western Bitulithic company, but has not as yet been prepared. It will probably be signed by Judge Funk to- morrow.

In order granting Mary Lemon attorney fees and an allowance pending an outcome of her suit for divorce from Alex Lemon was issued by Judge Funk to-day.

HOME IN GOOD SEASON.

Tenth Annual Outing of the Grocers and Butchers Was a Success.

The tenth annual outing of the grocers and butchers of beautiful Winona lake yesterday was a decided success. The day was ideal for the excursionists.

Sports of all kinds were enjoyed and one of the chief features of the day was the baseball game between the butchers and grocers, which resulted in a victory for the latter by a score of 9 to 1. In addition to the baseball plays were made on both sides.

The first section of the excursion left South Bend at 8:30 a. m. and others followed about 10 o'clock and the second section.

The National Grocer company and the Standard Oil company gave their employes a day off to enjoy the pleasures of the occasion.

Watchmaking in Switzerland.

There are about 35,000 persons employed in the watch factories of Switzerland, not including several thousand engaged in the "home industry." There are 427 factories, 218 of which manufacture complete watches, 209 cases and the rest dials, crystals, hands, springs, jewels, etc.

HOW THE TIBETANS DRESS.

Similarity in Ordinary Costumes of Both Sexes.

Lay and cleric alike, the inhabitants of Lassa are entirely similar in those of the rest of Tibet, says World's Work. There is, indeed, but one difference, even in the dress. In one province through which we passed the women use a turquoise-studded hair as a headdress; in Lassa a filet ornamented in the same way is bound close down over their hair, fluffed out on either side, and falls down over the shoulders. It is one of the most becoming ways of doing the hair that I have ever seen, and for a certain type the entire dress of a woman of Lassa would be a becoming costume for a fancy dress ball at home.

The dress of the men and the women is very similar. There is a single undergarment and one heavy native cloth robe, dun or crimson in color, and usually patched at the back, secure pull in around the waist with a girdle—the men pouching it at the waist to form the only pocket that they use.

STONE IN PERPETUAL MOTION.

What Would Happen to Projectile Dropped Through the Earth.

Most of us have probably speculated, at one time or another, what would happen if a hole were bored right through the earth and one were to drop a stone into it; and F. R. A. E. now gives his view on this puzzling question. "The stone," he says, "would fall with increasing speed to the center of the earth, where it would have attained a speed of nearly 200 miles a minute. Its momentum would carry it at a constantly retarded speed through the remaining half of its journey until by the time it appeared at the antipodes and of the hole it would have come to a standstill. It would then begin to drop again, and would perform exactly the same journey on its return to the starting point. Thus it would continue to travel backward and forward from one end of the earth to the other practically forever."—London Tit-Bits.

Poet as Public Benefactor.

A correspondent writes to the London Chronicle that he once came upon Robert Browning in Piccadilly in lively dispute with a stranger, who had carried his closed umbrella over his shoulder of under his arm, with the end sticking out. The stranger walking behind, struck down the dangerous point with an energetic stick. "I always do it" cried the poet with justindignation, and in no measured tones. The man protested aloud, but Browning explained to the gathering crowd and justified himself fully. No one seemed to know how illustrious was the heavier.

Lutheran Aid to Meet.

The Ladies' Aid society, of Holy Trinity English Lutheran church, will hold their regular monthly business meeting at the home of Miss Lodema Wonser, 107 North Cushing street, Thursday afternoon. All members and friends are requested to be present by the society.

BUILDING AND LOAN MEETING

LaSalle Association Steps Stockholders.

The annual meeting of the stockholders of the LaSalle Building Loan association was held last evening in the office of the association, 114 North Michigan street with a large attendance of members. The principal business of the meeting was the election of four members of the board of directors to succeed Samuel Leopold, Thos. Colfax Slick, Eugene H. Miller and F. M. Caldwell, and the reading of the annual report of the secretary.

The five retiring directors were re-elected for a term of three years, showing the confidence reposed in them by the stockholders and the satisfactory manner in which they and their fellow members of the board have conducted the affairs of the association.

The annual statement read by Secretary Caldwell showed earnings of eight per cent per annum for the past three years and that the assets of the association have almost doubled within the past year. The association has a number of loans on which coupons attached which are proving very popular with people having money to deposit.

FINISH STREET WORK

ACTION IS TAKEN ON VARIOUS IMPROVEMENTS.

Engineer Files Final Estimate and Assessment Rolls—Board of Public Works Meets.

At to-day's meeting of the board of public works the assessment rolls and final estimate upon the following improvements were filed by City Engineer A. J. Hammond:

A hearing on the confirmation of the final estimate for the brick pavement on Michigan avenue was continued to next Friday evening at 7 o'clock.

IS MARRIAGE A DISEASE?

Question Humorously Called to Attention of Scientists.

Sometimes it seems as though the anti-divorce enthusiasts were not as scientific in their methods as they should be. The great, abounding cause of divorce is, of course, marriage, and marriage, therefore, is the thing to investigate. First, then, is marriage a germ disease? We have considered this question a long time getting no further with it, but the scientific investigators will be able to tell us. And if it is a germ disease that can catch the germ, and the germ once caught they can get cultures and compose antitoxins which will strip this common and serious complaint of most of its terrors. And, of course, once we get marriage under control we shall be in a position to regulate divorce with a precision absolutely scientific, if there is any divorce left to regulate.—Harper's Weekly.

Drove the Question Home.

Remarkable was the sermon of the Rev. Andrew Clarke, delivered a few years ago in Glasgow. It waited patiently for the Lord," was his text; and this was his sermon: "Now, my brethren, I put it to you, if David could wait patiently and found it worth while, why can't you?"

How Historians Reached the People.

One time Mr. Gladstone during his active career addressed a long address to a single newspaper reporter in the house of a friend. This speech, taken down in shorthand and published in full in the newspapers, got a large audience.

Remarkable Sheep Drive.

Without being a single animal, seven shepherds recently drove a flock of 14,000 sheep from Mangya, in Queensland, to Narbel, in New South Wales, a distance of 300 miles.
