NO ARGUMENT.

It must be Drawn Right.

Drawing a glass of Soda means nothing to us but mixing the syrup and turning the faucet. It requires skill to draw a glass of Soda properly—considerable experience.

We know how to draw Soda. We know how to mix the proper syrup of each fruit to use to make the most delicious mixture. Now, we have a good Soda fountain, fitted up regardless of cost, and we have a lot of young men attendants who know how to draw Soda, water properly.

It doesn't surprise us that people tell us that it is the best Soda they ever tasted.

YOU brush your teeth perhaps three times a day and brush the food off the front surface into the spaces between the teeth. It's better to brush your teeth once a day and rinse your mouth thoroughly after meals and before retiring. If you have teeth that need attention attend to them at once. They're more important than new hats, bonnets, etc. Your present and future happiness depends upon sound teeth.
