HOPE FOR FOOTBALL

MAROON AUTHORITIES WILLING TO MAKE CONCESSIONS.

MAY NOT SUSPEND GAME

Chicago Will Ask That Training Table be Allowed—Favor One Year Freshman Rule—Conferences Friday Morning.

Chicago, March 7.—That the University of Chicago senate will surrender a large part of its radical views against football and allow its representative to take a more liberal attitude toward the game at the second "reform" conference to be held at the Chicago Beach hotel Friday morning, was the opinion expressed yesterday by Maroon professors and athletic Authorities.

According to the Midway authorities Chicago will submit to the rejection of the professional coach in cases where there are existing contracts, as at Michigan and Indiana, along with several other minor changes which the friends of the game have held out for, and may even withdraw from the Western conference if football for two years in order to hasten an agreement. The senate will meet to-day or to-morrow to take final action and instruct the delegate.

It is understood that the opinion has the suspension clause will be taken back, in view of the fact that only one other university has taken similar action. The Chicago senate delegate will be instructed to compromise during the first conference, and its deliberations and agreements were only tentative. Dean Albion Small, who will be Chicago's representative, was asked if the senate would insist on Chicago's not insist on the original "educational coach" clause which was expected to stir up difference of opinion in the conference.

May Hold Conference.

In regard to the playing rules now being formulated by the conference rules committee, the conference was expected to decide the fate of football. Little or nothing can be done, and for this reason Dean Small considers the conference premature. Another conference will probably be called to decide on the playing rules.

Following are the changes in the original proposals which the university students and critics believe Chicago should insist on: Professionals be not allowed to exist, providing it be not abolished in any way by the athletic treasury; that none of the rules regarding eligibility be made retroactive, but be made effective only for the beginning of football practice. These changes, the Chicago professors believe, will be necessary to make the recommendations at a practical. The one-year freshman rule and strict eligibility provisions are favored.
