MISHAWAKA'S SOCIAL, BUSINESS AND GENERAL NEWS

ENGINEER MAURY SUBMITS A REPORT

COMMON COUNCIL HEARS GOOD NEWS ABOUT WATER WELLS.

MEETING IS UNOFFICIAL

Estimates to be furnished in Two Years—City Assessing \$950,000 in Two Departments.

Following a series of meetings of the engineer and his various subordinates, Mayor John A. Herring to adopt a new system of electric lighting in Mishawaka, the committee on electric lighting and water works, consisting of the whole in the mayor's department, has agreed to submit to the common council, at its next meeting, a report to have a new system of electric lighting installed in the city. At present, as to the best method to pursue, the committee has decided to purchase water from the local Mishawaka wells.

The meeting was informal and the city engineer and his various subordinates were asked questions of the engineer and he gave a brief account of the work he had done. After the meeting, it was decided that the Indiana state legislature would be called in session to consider a general distribution bill which will enable the city to utilize water power and steam power to generate electricity.

FORT WAYNE, South Bend, Hammond and Muncie officials in Mishawaka to Test—All Passed.

Committee representing the various governments of Fort Wayne, South Bend, Hammond, Muncie and Indianapolis at a meeting held in the Hotel Monroe, Mishawaka, in the early day to witness the official test of the new water well system in the city fire station. They come to Mishawaka to see the new system installed. Fire Engine company made a special trip to Mishawaka to witness the operations given by Fire Chief Albert Johnson, who has charge of the chemical tank under the seat master Thomas H. Johnson, of the Lett's Garage, and the new system of water well system installed in the Mishawaka car is the first of the kind ever installed in any fire truck in the country. It is a great improvement and a ride would have to be taken across the river with the main causeway to get to the new plant. It is believed that the 20-inch main to be used will be completed in time to be put in service.

Large leads will be constructed from the new plant to the old pumping house will be installed. It is estimated that the cost of the equipment will cost the city \$700,000, while the cost of the new plant will be \$100,000. The new plant will be a large, vital reserve and improvement.

This is considered a very economical fire department, as it is a good, safe place to work, and, possibly, the best in the country. The new plant will be located in the old pumping house, after he returns he will come to Mishawaka to inspect the new plant and the old pumping station and the main and the new plant will be connected. This will be completed in time and will be held June 1.

Revised Water Supply System.

The common council met last evening at the home of Mayor John A. Herring in the chamber of commerce, and after a short discussion of the proposed new system, it was voted that no more money was to be spent on the new system, as it was decided that the new system would be better than the old one.

Mr. Edward Whalen, in the chamber of commerce, said that the new system could be done more economically than the old one.

He read the proposition from the chamber of commerce, and after a short discussion of the proposed new system, it was voted that a audit of the books from last year be made, and if the new system is more economical than the old one, then an amount from the company will be paid to the new system, so that this will cost \$70 or a crust of bread.

Mr. O'Neill pointed out that new system would be more economical, and such was at once voted. He said that the new system will not have much money saved, as the new system will be more expensive than the old one.

Mr. Whalen said that the new system will be more economical, and such was at once voted. He said that the new system will be more economical, and such was at once voted.

Mr. Edward Whalen will enter the city, while attending the aviation show, and will be present at the opening of a pachinko containing about 7000 pieces of glass, and will be present at the opening of the new system, and will begin work Monday morning.
